

People Automation

Warranty

A practical launch and maintenance artifact for Vanta Recruiting and People workflows.

Illustrative working artifact by Russell Dudek. It is designed to make workflow decisions explicit, not to represent Vanta's current internal process.

Workflow identity WORKFLOW / OWNER

USER + PROMISE

Who is served, what work improves, and what should remain true?

BASELINE

Current manual touches, time, rework, exceptions, experience, and source.

SOURCE OF TRUTH

System, fields, knowledge, owner, permission, freshness, and conflicts.

MECHANISM FIT

■ Process redesign ■ Standard automation ■ Script/integration ■ AI ■ Hybrid

HUMAN AUTHORITY

What may act automatically? What requires review? What remains human-owned?

FAILURE PATH

Stop condition, exception view, recovery owner, context preserved, response target.

OPERATING PROOF

Metric, unit, source, baseline, review cadence, experience signal, adoption signal.

STEWARDSHIP

Business owner, technical partner, knowledge owner, change test, maintenance cadence.

DECISION DATE

■ Scale ■ Repair ■ Keep human-led ■ Retire

Date: _____

Launch questions

Right problem?

Right mechanism?

Is manual effort the real constraint, or is the work unclear, unowned, or unnecessary?

Does AI add value beyond rules, scripts, integrations, or process redesign?

Right authority?

Right evidence?

Could the workflow affect fairness, compensation, employment decisions, privacy, or candidate trust?

Can the team observe value, errors, exceptions, adoption, and maintenance cost?

Maintenance review

Review

Evidence

Decision

Source

Freshness, permission, definition changes, conflicts

Keep / repair source

Behavior

Failures, exceptions, recovery, duplicate or missing actions

Repair / narrow

Experience

User edits, bypasses, candidate or employee confusion

Redesign / train

Economics

Labor avoided, cycle time, tool and maintenance load

Scale / retire

Ownership

Active steward, knowledge owner, systems partner

Reassign / hold

Decision record
